Fathy Abdelkader

Backend PHP Laravel Developer

fathyabdelkader8@gmail.com 01064274581 Github portfolio Linkedin

Mansoura, Egypt

Profile

Junior Backend Developer with a strong foundation in PHP, Laravel, and MySQL. Specialized in building robust, secure, and scalable backend systems. Passionate about writing clean, optimized code and ensuring seamless integration with frontend components. Eager to contribute to impactful projects within collaborative teams while continuously improving and growing as a developer.

Education

Bachelor's degree of Computer Science 2020 – 2024

Mansoura University

- Artificial Intelligence
- **Grade**: Very good (GPA : 2.89)
- **Graduation project**: Go Smart is an app that guides users to cultural landmarks, hotels, and restaurants across Egypt. It includes reviews, personalized itineraries, and a driver booking system for smooth travel (A)

Projects

Hotel Management System May 2025 – Jun 2025

laravel 12

Built a secure hotel management API with JWT authentication and role-based access (admin, receptionist, customer). Implemented room inventory, booking lifecycle, check-in/out workflows, and Stripe payment integration. Structured using Service Layer and Spatie Permissions for clean and scalable authorization.

Shop Dec 2024 – Feb 2025

Developed a modern e-commerce website featuring secure authentication with welcome email, dynamic product browsing, advanced cart and order placement, Paymob payment integration, and a search feature. Built an admin dashboard for managing products, categories, users, and orders.

Mentor Feb 2025 – present

Built an educational platform connecting students with expert trainers, featuring course browsing with a popular courses section based on engagement. Includes trainer profiles with social media links, an event system for webinars and workshops, secure authentication, and profile management with profile photo uploads and account deletion. Trainers can also create and manage courses and events through dedicated interfaces.

Blog Nov 2023 – Dec 2023

Developed a blogging platform with email or phone authentication, user profiles, CRUD operations for posts, and a search feature. Designed an admin dashboard for category management and pagination for easy navigation.
